Index for Volume 96

AUTHOR AND SUBJECT INDEX. Pages indicating errata are in italic.

Abad, G., S87, S134
Abad, J., S1, S59, S87
Abad, Z. A., S1
Abadias, M., S51
Abang, M. M., 1214, S2
Abawi, G. SS44, S176, S178, S182
Abbas, H. K., S2
Abd-Elmagid, A., S2
Abdollahi, K., S25, S157
Abello, J., S59
Abelmoschus esculentus, yellow mottle, Mexico, 1046
Abidou, H., S166
Abler, R. A. B., 926
Abou-Jawdah, Y. A., S32
Abraham, A. D., 437
Abraitis, R., S96
Abramovitch, R. B., S151
Abrams, J., 616
Abutilon theophrasti, control with *Colletotrichum coccodes*, metallothionein, 1116
Acevedo, M., S2
Acholeplasma spp., genome encodes enzymes, cell wall degradation, S190
Achor, D., S3
Acidovorax avenae
—subspecies genetics, S94
—on watermelon, genetic diversity in China, S130
Acosta-Leal, R., S3
Acremonium spp.
—*A. implicatum*, transformation with *Agrobacterium*, S59
—*A. zeae*, on maize, pyrrocidines, endophyte and pathogen effect, S122
Actinidia chinensis, soft rot, resistance biochemical markers, lyase and chitinase activities, S125
Adams, G. C., S3
Adaskaveg, J., S26, S58, S131, S166, S167, S169
Adeleke, R., S8
Adhikari, T. B., 885, S3, S4, S85, S91, S108
Adkins, S., 460, S3, S188
Aebig, J., S45, S73
Afriyie-Gyawu, E., S152
Agarkova, I. V., 1270, S52, S94
Agindotan, B., S3
Agnew, M., S58
Agrobacterium spp.
—*A. radiobacter*, on herbaceous perennials, bacterial antagonists, S95
—*A. tumefaciens*: on *Arabidopsis*, VirE1-mediated resistance, 105; genetic transformation of plants by, interacting protein, S5; on herbaceous perennials, PCR detection, S79; salicyclic acid effect, 804; T-DNA integrated into *Magnaporthe grisea*, S24
—*A. vitis*, on grape and tobacco, hypersensitivity, S178
Agrostis stolonifer
—dead spot: predictive model, S58; severity and overwintering, 248
—defense mechanisms and elicitors, S42
Aguilar, E., S81, S162, S164
Ah Chee, A., S4, S125
Aigbe, S. O., 673
Aime, M. C., S138
Akamatsu, H., 1148, S4, S23
Akimitsu, K., 934
Alameda, M., S162
Albano, J. P., S147
Albertazzi, F., S165
Aldwinckle, H. S., S29, S86, S101, S176, S177, S180, S183
Alexander, N. J., S4
Alfalfa (see also *Medicago truncatula*)
—disease resistance, persistence, S6
—nematodes and nematode-trapping fungus, interaction, 1388
Alfalfa mosaic virus, on potato, molecular detection, 1237
Alfano, G., S4
Ali, R., S149
Ali, S., 885, S3, S4, S85, S91, S108
Alkharouf, N. W., S104, S191
Allan, N. D., S73
Alldredge, R. J., S23
Allen, C., S25, S36, S128
Allen, T., S4, S5, S94
Allium sativum (see also Onion): fungicides for diseases, Washington, S167
Almeida, M. S., S53
Almeida, R., S5, S14
Alternaria spp., on almond and pistachio, azoxystrobin resistance, California, S71
—*A. alternata*, on tangerine, fungicide and lesion age factors, S188
—*A. brassicicola*, anastomosis and vegetative compatibility, S27
—*A. citri*, on citrus: histidine auxotroph mutant, cover photo, September; postharvest pathogen, virulence-reducing mutation, 934
—*A. dauci*, on carrot, diversity and biology, S99
Alvarez, A. M., S58, S89, S119
Alvarez-Ruiz, P., S5, S38
Amaranthus spp., *Microsphaeropsis amaranthi* for control, climatic constraints, 308
Ambourn, A. K., S57
Amein, A., S2
American Phytopathological Society
—annual meeting abstracts, June supplement, S1
—annual report, 17
—author index of abstracts, S193
—Caribbean Division abstracts, 2005, S162
—Excellence in Extension, 26
—Excellence in Teaching, 27
—Fellows, 19
—International Service award, 28
—Noel T. Keen award, 30
—North Central Division abstracts, 2005, S173
—Northeastern Division abstracts, 2005, S176
—officers, representatives, and committees, 14
—Pacific Division abstracts, 2005, S166
—Potomac Division abstracts, 2006, S190
—publication policies, 2
—Ruth Allen award, 29
—Southern Division abstracts, 2006, S184
—special session presentation abstracts, S132
—Syngenta award, 31
Amnuaykanjanasin, A., S48
Amylostereum areolatum, woodwasp vector, detection in pine, S123
Anagnostakis, S. L., S177
Anand, A., 804, S5, S120
Anas, O., S5
Anchieta, A. G., S124
Andersen, M. T., 838
Anderson, J., S151, S156
Andreu, A., S69, S99, S124
Andrews, S., 105
Andrieux, A., S34
Andrivon, D., 777
Andropogon gerardii, rust and drought effect on genes, S37
Angel, C. A., S5
Angelica lucida, virus, novel in Alaska, S98
Angelonia flower break virus
—on *Angelonia*, cover photo, May
—novel carmovirus, 460
Anguina tritici, on wheat, in U.S. wheat for export, S79
Anikster, Y., S112
Anisogamma anomola, on filbert, geocaching, S170
Ankrah, N. A., S152
Annis, S., S76
Ansari, K. I., S16
Anthony, K. L., S6
Antirrhinum majus, soilborne fungi, pathogenicity in Florida, S188
Aoun, M., S6
Apampa, K., S112
Aphanomyces euteiches
—population biology, S146
—population genetics, 1134
Aphelenchoides spp., detection method, ornamental crops, S75
Appel, D. N., S157
Apple
—blue mold, biocontrol, S53
—*Colletotrichum* spp., leaf spot and bitter rot, etiology, 982
—fire blight: blossom age and cultivar effect, S29; cymoxanil, famoxadone, S92; silencing DspE-interacting proteins, S176
—flyspeck, fungus species cause, S10
—fungal flora, identification, S68
—gray mold and blue mold, postharvest, pyraclostrobin and boscalid for control, S125
—HIPM protein, characterization, S181
—integrated control, Serenade MAX, S48
—*Penicillium expansum*: fludioxonil- and pyrimthanil-resistant mutants, S67; and *P. solitum*, factors, S75
—phytoplasma, detection in Mexico, S67
—postharvest decay, methylcyclopropene effect, S100
—postharvest disease, biocontrol with *Pichia anomala*, 80
—powdery mildew, milk fat and soybean oil emulsions, S4
—replant site, orchard treatments, S115
—rust, New York, S100
—scab: compost and compost tea applications, S115; epidemic in Pennsylvania, disease management, S118; sanitation treatment, S49
—sooty blotch and flyspeck: apple juice effect, S65; complex in eastern USA, analysis, S29; complex in Germany and USA, S10; complex, identification techniques, S31
—transgenic, disease resistance induced, S18
Apple chlorotic leaf spot virus
—movement protein, interference, 378
—on *Nicotiana benthamiana*, silencing, S126
Apple latent spherical virus, *Bean yellow mosaic virus* interaction, mixed infections, fluorescent proteins, S112
Arabidopsis spp., disease resistance, BONZAH11/COPINE1 protein, S76
—*A. thaliana*: bacterial community, salicylic and jasmonic acids, defense, S149; *Botrytis cinerea*, hypersensitivity, elicitor, 299; crown gall, VirE1-mediated resistance, 105; *Magnaporthe grisea*, pathosystem, S90
Aragaki, M., S116
Aranda, S., S37
Arcate, J., S59
Arceuthobium vaginatum, on ponderosa pine, Colorado, S62
Archibald, D. D., S63, S131
Arevalo-Guerra, M. A., S79
Arguello-Astorga, G. R., S77
Arias, C., S87

Arie, T., 908, S4
Ariss, J. J., S6
Armengol, J., 288
Armillaria spp.: on cherry, distribution in Michigan, S32; on daylily, ITS and IGS-1 sequences, S184; on pine forests, mode of spread, molecular tools, S30; on *Pinus radiata*, treatment area delineation, 630
—*A. ostoyae*, on ponderosa pine, wood block traps, S13
Armstrong, C., S6
Armstrong, M., S149
Armstrong, R., S123
Arnold, A. E., S136
Arseniuk, E., S72
Artichoke yellow ringspot virus, on onion, molecular identification and cytopathology, 622
Arul, J., S26
Ascochyta spp., on legumes, specificity and pathogenicity of interspecific hybrid, 1148
—*A. rabiei*, on chickpea, fluorescent protein, S4
Asensio, C., 1204
Asensio, M., 320
Ash, J., S66
Asparagus, *Xanthomonas translucens*, classification of variants, 876
Aspergillus spp.
—*A. flavus*: on corn, pin bar inoculation, S2; on corn kernels, aflatoxin, 87; on corn kernels, aflaoxin biosynthesis, S50; on cottonseed, soil factors and rotations, Texas, 599; diploid strain, aflatoxin silencing, S53; oxylipins, determinants, S106
—*A. niger*, on onion: seedling infection, S106; soil population, S182
—*A. ochraceus*, Ochratoxin A biosynthesis, genes, S8
Astragalus utahensis, *Aspergillus* and *Alternaria* effect on germination, S32
Astúa-Monge, G., 1092
Asurmendi, S., 1175
Atallah, Z. K., 1037
Atamian, H. S., S32
Austerlitz, F., 280
Austin, C. N., S6
Author index for abstracts, S193
Avant, J. B., S14, S53
Avila, K., S36
Avis, T. J., S6, S7
Ayoubi, P., S93
Aziz, A., 1188
Azpilicueta, A., S164

Babadoost, M., S7, S57, S91, S103
Babbitt, R., S129
Babcock, C., S133
Babina, F. A., S102
Bacetty, A. A., S7
Bacher, S., 813
Bacillus spp.
—*B. mojavensis*, endophyte, transformation with GFP, S87
—*B. subtilis*, biocontrol agent, genetic markers, 145
Backhouse, D., S107
Backus, E. A., S7
Bacon, C. W., S7, S87
Bacteria
—coffee and avocado, description, Costa Rica, S162
—soilless cultures, filter efficiency, S97
—stomatal role in immunity, S77
—virulence and type III effectors, S150
Badillo-Vargas, I. E., S162
Bagci, A., S169
Bai, G.-H., 496, 534
Bai, J., S37
Bailey, A. M., S7
Bailey, D. J., 510
Bailey, W. D., S105
Baker, A. H., S125
Baker, C. A., S3
Baker, C. M., S8
Baker, R. L., S8
Balaji, B., S5
Balci, S., S8
Balci, Y., S8
Baldauf, P. M., S8
Baldo, A. M., S86
Baldwin, M., S190
Balint-Kurti, P. J., 120, 221, 1067
Balogh, B., S53, S98
Balota, M., S94
Banana, Fusarium wilt, symposium, 653
Banana bunchy top virus, molecular epidemiology, Hawaii, S5
Bandyopadhyay, R., 673, S8, S16
Banga, S., S46
Banihashemi, Z., S8, *1046*
Barash, I., S85, S122
Barasubiye, T., S41
Barata, R. M., S9
Barbara, S., S4
Barbetti, M., S71
Barker, K., S159
Barley
—*Fusarium graminearum*, deoxynivalenol quantification, phenotypes, S39
—Fusarium head blight, floret infection, 567
—*Fusarium* seedling blight, biological control, 386
—rust, race TTKS resistance, S110
—scald: disease cycle and phases, 1214; fertile crescent not center of origin, diversity analysis, 941
—Septoria speckled leaf blotch, resistance, molecular mapping, 993
—spot blotch: durable resistance, trait locus, S20; mapping resistance loci, 699; resistance gene *Rpg1*, S12
Barley mild mosaic virus, Korean-Naju strains, S56
Barley yellow mosaic virus, *Polymixa graminis*-infested soils, S52
Barnes, C. W., S9, S173
Barney, W. P., S114
Baron, J. J., S16
Barrès, B., S34
Barreto, E., S38
Barreto, F. A., S113
Barszcz, E., S179
Bartz, J. A., S9
Bar-Yosef, B., 771
Basim, E., S9
Basim, H., S9, S128
Bassett, C. L., S86
Bastianel, M., 1092
Bastien, M., S10, S52
Bateman, A. M., S10
Bates, C., S10, S173
Bates, G. D., S10
Batzer, J., S10, S29, S31, S64, S65, S122
Baudoin, A., S190
Baum, M., 1214, S2
Baumgärtner, K., S10
Baysal-Tustas, F., S11
Bazzini, A. A., 1175
Beachy, R. N., 1175, S109
Beam, R. D., S62
Bean, T. P., S11
Beas-Ruvalcaba, K., S74, S94
Beattie, G. A., S122
Beaulieu, C., S36
Beauveria bassiana, systemic resistance induced in cotton against *Xanthomonas*, S42
Beck, H. W., S80
Becker, J. O., 111, 855
Beech, mortality in Maine, S59
Beed, F., S79
Been, T. H., 226
Beer, S. V., S176, S179, S181
Beet necrotic yellow vein virus
—allelic discrimination in types, S3
—pathogenicity and species structures, S3
—resistance-breaking isolates, USA, S69
—on sugar beet, crop loss and digital imagery, S56
Beet pseudo yellows crinivirus, on cucurbits, Costa Rica, S96
Beet severe curly top virus, on sugar beet, resistance and insecticide treatments, S111
Beever, R. E., 838
Begomovirus
—movement protein, host factor, S130
—on tomato, PCR for detection, 517
Bejarano-Alcázar, J., 288
Bekal, S., S11, S149
Bélanger, R., S27, S42, S73, S80, S83, S97, S156, S178
Bell, A. A., S11
Bellizzi, M., S118
Belzile, F., S10, S42, S52, S73, S178
Ben-Daniel, B.-H., 417
Ben-Daniel, Y., 417
Bender, C. L., S8
Benhamou, N., S65
Benitez, M., S11, S100
Ben-Joseph, R., 447, 1404
Beno, N., S80
Benson, D. M., S185
Benson, E. C., 828
Benson, J., S20
Benson, M., S42, S87, S126
Bent, A., S111, S159
Bent, E., S167
Bentley, A., S27
Bentley, S., S134, S135
Bentley, T. C., S12
Ben-Yephet, Y., 771
Berardi, R., 709
Berestecky, J. M., S58
Bergdahl, D. R., S178, S182
Bergelson, J., S149
Berger, P., S74, S154
Bergstrom, G. C., 1021, S104, S125
Berkowitz, G. A., S149
Berland, P. A., S114
Bernal, A., S38, S113
Bernard, K., S133
Berner, D. K., S14, S17
Berney, M., S12
Bernier, L., 526, S6, S15, S31, S81, S93, S157
Berruyer, R., 346
Berry, C. L., S12
Berry, S. A., S174
Bertolini, E., 313
Bertrand, P. F., S110
Bérubé, J. A., S137
Betula papyrifera, mycorrhizae, soil factors, S61
Beyer, M., S62
Bezerra, J. L., S12
Bharathan, N., S6
Bharathan, S., S6
Bhat, R. G., S166
Bhattacharya, A., S114
Bienapfl, J., S90
Bigelow, D. M., S170
Bilderback, T. E., S147
Bilgic, H., 699, S12, S20
Biocontainment, questions about, S60
Biofilms fungal, disease role, S73
Biofumigation, brassica crops, soilborne pathogens, South Carolina, S85
Bioinformatics
—database profiling, PLEXdb, S161
—DNA sequence patterns, new tools, S160
—Fungal Gene Initiative, S161

—pathosystems biology resources, S161
—phylogenomic exploration, S160
—plant pathology application, genomic data, S160
Biological control
—*Alternaria alternata* for *Plasmopara viticola*, grape, 689
—*Bacillus licheniformis* for *Rhizoctonia* and *Phytophthora*, ornamentals, S122
—*Bacillus subtilis*, genetic markers, 145
—bacteria for broccoli head rot, evaluation, 408
— *Colletotrichum coccodes* for velvetleaf, metallothionein, 1116
—cotton diseases with *Trichoderma virens*, mechanism, 178
—*Dactylella oviparasitica* for *Heterodera schachtii*, 111
—disease suppression, factors, meta-analytical review, 1168
—factors, meta-analysis, S87
—genetic transformation, agents and methods, S178
—hyphal growth modeling, soil, 1108
—*Lysobacter* spp., in rhizosphere and phylloplane, nematode effect, S154
—*Lysobacter enzymogenes*: antibiotics and nematodes, S128; interaction mechanism, S154
—*microsphaeropsis amaranthi* for *Amaranthus* spp., 308
—myxobacteria: and gliding bacteria, taxonomy, S153; secondary metabolites, S153
—myxobacterial ecology, S153
—*Pichia anomala*, on apple, postharvest disease, mechanism, 80
—protein, self-inhibiting, metabolites, S69
—*Pseudomonas fluorescens*, 2-4-diacetylphloroglucinol production, rhizosphere effect, 751
—rust for *Cirsium arvense*, weevil transmission, 813
—*Trichoderma* spp., plant interaction, symposium, 181
—*Trichoderma viride*: and compost for Allium white rot, 1009; for *Sclerotinia sclerotiorum*, S164
—wheat and barley to *Fusarium* seedling blight, 386
Biology of plant pathogens, special session, S132
Biopesticide
—challenges in global marketplace, S155
—commercialization facilitated, S156
—Cooperative State Research, Extension & Education Service role, S156
—EPA role, S156
—forest weed control, targets and problems, S155
—product development, European regulatory hurdles, S156
—university research involvement, S156
—visions vs. reality, S155
Birch, P., S96
Bird, D., S148
Bird, G. F., S173
Bird, G. W., S10, S12
Bithell, S., S167
Blackberry virus Y, yellow vein disease, S112
Blair, J. E., 920, S12
Blanchard, A., S149
Blanchette, R. A., 171
Blanco, M., S13
Blankenship, J. D., S34
Blein, J., S80, S140
Blinkova, O., S77
Block, C. C., S35, S107
Blodgett, J. T., S13
Blok, V., S149
Blomquist, C. L., S114, *1416*
Blueberry
—epiphytes, enzyme and biocontrol, S57
—mummy berry disease, biocontrol, S76
Blum, K. L., S13
Blumer, S. E., S147, S175
Blumeria graminis, on wheat:
—adult-plant resistance, loci mapping, 784
—Milsana effect on germination and defense, 1278
—resistance gene, 496
—virulence variability in Iran, S96
Blumeriella jaapii
—sterol demethylation inhibitor fungicide resistance, 709
—on tart cherry, copper fungicide effect, S43
Blunt, T., S13
Boal, R. J., S125
Bock, C. H., S13, S14
Bockelman, H. E., S63
Bogdanove, A., S70, S84, S121, S136
Bohlmann, J., S29
Boivin, K., S6
Bolat, N., S166, S169
Bollich, P., S105
Bolognesi, M., 155
Bonants, P., S147
Bonas, U., S135
Bonasera, J. M., S179
Bond, J., S105
Bonde, M. R., S14
Bonello, E., S61
Bonello, P., S34, S119, S157
Bonifacio, A., S112
Bonman, J., S14, S53
Bonos, S. A., 808
Bonsall, R. F., S170
Boonham, N., 975
Boratynski, T. N., S5
Borejsza-Wysocka, E., S86, S176, S180
Borejsza-Wysocki, W. S., S176
Børja, I., 1305
Borneman, J., 111, 855, S167
Borowsky, M., S137
Borrone, J. W., S139
Borselli, S., 689
Borsick, M. A., S14, S176
Borth, W., S14, S77
Børve, J., S110
Bos, J., S4
Bostock, R. M., 1072, 1372, S30, S66
Boston, R. S., S50
Botella, L., 356
Botryosphaeria dothidea, on pistachio, fungicides, S81
Botrytis cinerea
—on *Arabidopsis*, elicitor and hypersensitivity, 299
—on grape: chitosan and copper sulfate, 1188; protection by *Pythium oligandrum*, S80; treatments, S179
—greenhouse crops, silicon-induced resistance, S57
—spread and survival in greenhouse, markers, 1195
Boudon-Padieu, E., 790
Boudreau, M. A., S14
Boulay, M., 1060
Bounds, R. S., S173

Brandl, M. T., S150
Brannen, P. M., S5, S16
Brantner, J. R., S123
Brar, A. K., S184
Brassica spp.: Alternaria blight, resistance sources, S46; leaf spot, black rot, pathovars, 735; seed meal amendments, apple replant problem, S53
—*B. oleracea*, head rot, biological control, 408
Brassinosteroids, nodulation autoregulation, role, S88
Braun, H. J., S169
Braun, U., S139
Braverman, M. P., S16
Bredehoeft, M., S56
Bremer, D. J., S37
Bremia lactucae, sporulation, factors, S86
Brendel, V., S70, S136
Brennan, J. M., S16
Brenneman, T. B., S31, S110, S184, S189
Brenneria rubrifaciens, on walnut:
—PCR detection, S75
—pigment production, gene loci, S75
Bressan, A., 790
Breuil, C., 526, S29, S107, S113
Briceno, E. X., S16, S65
Brito, J. A., S182

Fumigation
—dimethyl disulfide, nematodes and fungi, S100
—methyl isothiocyanate, mulched soil beds, distribution, S184
Fungicides (general) (also see Fungicides, specific)
—biofungicides, EPA registration, S16
—biopesticides, IR-4 role in regulatory assistance, S16
—Botrytis, on grape, mode of action, S131
—*Phytophthora infestans*, field population, center of origin, 1397
—screening and efficacy testing, anti-biofilm products, S73
—spray heterogeneity, resistant pathogen regional spread, 549
—sterol demethylation inhibitor, resistance to *Blumeriella jaapii*, 709
Fungicides (specific) (also see Fungicides, general)
—aluminum, *Phytophthora parasitica* and *Thielaviopsis basicola*, 212
—benomyl, *Colletotrichum gloeosporioides* on

Limonium spp., resistance, 542
—benzothiadiazole, petunia, potato, and tomato, molecular response, S177
—copper, technology, new from DuPont, S123
—mandipropamid: late blight and downy mildew of tomato, potato, and cucurbit, S185; oomycete control, properties, S51
—Triflumizole, tree nut, fruit, vegetable, and vine crop control, S34
Funnell, D. L., S37
Fusarium spp.: banana vs. carnation leaves for identification, S83; on cassava, complex in West Africa, symposium, 673; conifer nursery, molecular characterization of species, S111; on corn stubble, Connecticut, S32; on ginseng, detection methods, S41; on ginseng, rusty root, S170; grassland soils in New Zealand, S27; on mango, malformation in Mexico, S99; mango, malformation, symposium, 667; tropical perennial crops, symposium, 648; on wheat and barley, head blight, biofilm and fungicides, S46
—*F. avenaceum*, on cabbage, head rot in New York, S30
—*F. circinatum*, on pine, symposium, 657
—*F. culmorum*: on rye, variability in Russia, S102; on wheat, PCR assay, *tri5* gene, S92
—*F. graminearum*: on barley, fungus and lesion distribution in florets, 567; on barley, protein analysis, S39; population shifts, Upper Midwest, S37; on wheat, blight and deoxynivalenol, meta-analysis, 951; on wheat, head blight resistance in recombinant inbred population, 534; on wheat and barley, inoculum dynamics in South Dakota, S88
—*F. moniliforme*, phylogenetics, old and new clades, S55
—*F. oxysporum*: beet-cyst nematode suppressed by, 855; bikaverin, activity against *Phytophthora infestans*, S109; on birdsfoot trefoil, wilt in New York and Vermont, S125; in conifer nursery, *F. commune* comparison, 1124; on cotton, relation to root-knot nematode, 727; on lettuce, PCR-based method, two-step, S75; on lettuce, seedborne transmission, S132; on lettuce, sequence-specific amplified polymorphism, S91; on oil palm, symposium, 660; on tomato, race 2, resistance gene, S32; on watermelon, race 3, new, S130
—*F. pseudograminearum*, on cereal residue, displacement by antagonists, S107
—*F. solani*: on blueberry, root rot, S124; on cucurbits, race 1, control, S76; on soybean, cyst nematode interaction, factorial experiments, 1409; on soybean, *Heterodera glycines* interaction, 763; on soybean, mapping-resistant loci, S61
—*F. verticillioides*: on corn, ear dissemination, S128; fumonisin biosynthesis, protein phosphatase, S24; on maize, sphinganine accumulation, S93; polyketide synthase genes, S95
—*F. virguliforme*, on soybean, molecular study, S72
—*F. xylarioides*, on coffee, production constraints, Africa, symposium, 663
Fusicladosporium effusum, on pecan, nickel effect, S97
Fusicoccum sp., on pistachio, prediction of blight by Bayesian methods, 1142

Onion (see also *Allium sativum*)
—*Alternaria* spp., characterization, Puerto Rico, S162
—*Artichoke yellow ringspot virus*, molecular identification and cytopathology, 622
—bacterial blight, molecular epidemiology, seed production fields, 1345

—foliar bacteria, Puerto Rico, S162
—leaf spot, Puerto Rico, S35
—soilborne pathogens, characterization, S162
—white rot, compost and *Trichoderma viride* for suppression, 1009
Ophiosphaerella spp.
—*O. agrostis*, on creeping bentgrass, pseudothecia: cover photo, March; severity and overwintering, 248
—*O. herpotricha*, on bermudagrass, viability in winter, S119
—*O. korrae*, on bermudagrass, Mississippi, S92
Ophiostoma spp., on elm, DNA transposons, S15
—*O. clavigerum*, on lodgepole pine, methyl jasmonate treatment, S29
—*O. novo-ulmi*: ammonium transporter gene, S93; on elm, gene identification, S6; on elm, fruiting body genes, S31
—*O. piceae*, pigmentation-related genes, insertional mutagenesis, S113
Opio, F., S40
Opperman, C. H., S149
Orchid
—*Cymbidium mosaic* and *Odontoglossum ring spot viruses*, survey, S76
—*Fusarium* spp., Hawaii, S112
—viruses, DNA microchip array for detection, S21
Ordonez, M. E., S87
Ornamentals
—potyviruses, molecular characterization, S56
—powdery mildew, management, S157

Pettis, G. S., S42, S105
Pfender, W., S93
Pfund, C., S111, S158
Phaeocryptopus gaeumannii, on Douglas-fir, spread in Pacific Northwest, S145
Phaeosphaeria nodorum, RNA polymerase II gene, S72
Phakopsora spp., on soybean, temperature effect, S14
—*P. pachyrhizi*: on soybean, detection using PCR and rain collector, S9; on soybean, epidemic progress and disease model, 400; on soybean, fungicide effect on germ tube and appressoria, S67; on soybean, fungicide timing, S17; on soybean, proteins from, spore germination, S71; on soybean, proteome analysis, S22; on soybean, spore detection, PCR assay, S9; on soybean, spore trap evaluation, S82; urediniospores, solar radiation effect, S31
Phalaenopsis spp.
—chlorotic necrosis and ringspots, tospovirus, S130
—chlorotic spots, new potyvirus, S22
—wilt, fungicides, S60
Pham, V. D., S153
Phan, N., S83
Phaseolus spp.
—*P. vulgaris*: angular leaf spot, gene analysis, S72; bacterial blight, strain diversity, multiple

introductions, 1204; chocolate pod, *Clover yellow vein virus* cause, S169; pod rot, cultural practices, S113; *Pythium* and *Phytophthora* spp., characterization in Oklahoma, S30
—*P. lunatus*, resistance to downy mildew, screening, S103
Philion, V., S182
Phillips, D. V., S188
Phillips, M., S149
Phillips, T. D., S152
Phillips-Mora, W., S138
Phipps, P. M., S91
Phlox divaricata, carlavirus, genomic sequence, S45
Phoma spp., on onion, characterization, S162
—*P. ligulicola*, azoxystrobin sensitivity, Australia, S92
—*P. lingam*, on *Brassica*, blotter test protocol, S107
—*P. medicaginis*, on *Medicago truncatula*, resistance sources in SARDI core collection, 1330
—*P. sclerotioides*, on forage legumes, distribution in northeast USA, S125
Phomopsis spp., on Norway spruce, *Gremmeniella* association, 1305
—*P. longicolla*, on soybean: seed decay, S68; seed quality relation, seasonal progress, S78
Phyllosphere
—biotrophy, rust, S149
—pathogen interaction, host environment, S150
Phylogeny, *Pythium* and *Phytophthora* spp., DNA barcoding, S134
Phymatotrichopsis omnivora, on alfalfa, tolerance, S65
Physiologic specialization, pathogen speciation, sympatric race formation, life cycle, 280
Phytophthora spp.: on *Austrocedrus chilensis*, Argentina, S42; collection with *Pythium* in North Carolina, S1; detection in run-off water retention base, Virginia, S40; on European beech, geographic distribution, S181; on European beech, mefenoxam and phosphorous acid sensitivity, S121; on European beech tree, detection in New York, S121; in forest soils and streams, Oregon and California, S96; forest streams, North Carolina, S52; genome sequence data, phylogeny, S12; mitochondrial genome organization, related Straminopiles, S98; molecular markers, genomic databases, S38; nucleotide polymorphism markers, S30; phylogenetic analysis, ITS-based, S134; *Pythium* spp. comparison, molecular characterization, S134; races, genotypes, and varieties, analysis, S51; reverse genetic TILLING resources, S51; sporulation, asymptomatic foliage, S28
—*P. cactorum*: hybrids, ecological niches, S72; on strawberry, pyraclostrobin and azoxystrobin sensitivity, S96
—*P. cambivora*, on rhododendron and *Pieris*, new dieback, North Carolina, S185
—*P. capsici*: on bean, Michigan, S39; detection assay, S109; genome sequencing and population biology, S147; in irrigation water, monitoring, S173; on pepper, chemical management, S74; on pepper, cultivar and production system, New Jersey, S125; on pepper, mefenoxam tolerance, S186; polyphasic taxonomic analysis, S71; *P. tropicalis* comparison, species boundaries, S134; in soil, oospore detection, S91; soil extracts, asexual propagules, S103; on vegetable crops, Florida, S185; zoospore germination, zoxamide and dimethomorph effect, S186
—*P. cinnamomi*: on Fraser fir, sequence analysis, North Carolina, S42; oak, occurrence in eastern USA, S8; sporangial production and rhizosphere bacteria, S167
—*P. citricola*: on beech, population diversity, S83; on English walnut, phosphonate treatments, S17; on nuts and strawberry, California, S166
—*P. foliorum*, on azalea, leaf blight, S114
—*P. infestans*: A2 mating type, Tunisia, S55; center of origin, fungicide resistance, 1397; on potato, Acrobat MZ in management, S99; on potato, cultivar mixtures and disease pressure, 777; on potato, infection pressure and scale modeling, S108; on potato, Korean isolates, fungicide effect, S128; over-winter survival, S57; population structure, center of origin, S147; soil suppressive to, Mexico, S180; on tomato, Florida, S105; on tomato, proteomic analysis, S27
—*P. nicotianae*: on citrus, viroid-infected, S114; on tobacco, race 4, S185; on tobacco, race stability, S37
—*P. palmivora*, on *Arabidopsis*, phophite induces defense response, S28
—*P. parasitica*: aluminum sensitivity, *Thielaviopsis* comparison, 212; on tobacco, cutinase gene, S7
—*P. phaseoli*, on lima bean, environmental factors, S103
—*P. pseudosyringae*, on oak, detection using mitochondrial genes, 336
—*P. ramorum*: on camellia and rhododendron, lesion size and coverage, S114; chlamydospores, density in soil, S25; chlamydospores, detection in soil, S190; chlamydospores, detection in soil using PCR, S191; detection, DNA sensitivity, S117; detection, soil and water, retail nurseries, S120; detection in urban forest, S158; diagnosis, PCR analysis, 975; on lilac leaves, behavior in pots, S107; lineages in forests and nurseries, multiple analyses, S147; molecular markers, isolate library for detection, S74; on oak, detection using mitochondrial genes, 336; on oak, survey in New York, S109; perspective from southeast USA, S146; redwood-tanoak forest, dormancy, California, S35; regulation and environment, eastern USA, S146; regulation in western USA, S146; on *Rhododendron*, flooding effect, S43; on *Rhododendron*, infection potential and sporulation, S75; soil treatments, nursery beds, S127; on tanoak, detection in sapwood, S170; on tanoak, seedling roots, S90; in tanoak, xylem sapflow and sapwood conductivity, S90; TaqMan chemistry, diagnostic methods, 846; temperature extreme effect, S115; on *Viburnum*, Petri dish rhizotron, S191; water potential, growth and survival effect, S30; zoospores and cysts, distinguishing methods, S169
—*P. siskiyouensis*, in soil and water, Oregon, S97
—*P. sojae*: growth medium, metalaxyl and mefenoxam amended, S174; on *Nicotiana benthamiana*, glycosyl hydrolase from, S26; on soybean, Colombian isolates, S113; on soybean, detection with PCR, 1315; on soybean, field diversity in Iowa, S20; on soybean, resistance and seed treatment fungicides, S130; on soybean, WinRhizo root analysis software, S83
Phytoplasma
—classification, RFLP analysis, S192
—European stone fruit yellows, risk factors, 890
—Flavescence dorée, vector specificity, 790
—genome instability, adaptation, S135
—Malaysian periwinkle yellows, phylogeny, S56
—pepper and tomato, detection in Mexico, S103
—sequence-variable mosaics, gene clustering, S191
—web-based resource center, S191
—Western X-disease, sequence, S68
Picard, Y., 1345
Picea abies, *Gremmeniella* and *Phomopsis* association, etiology and detection, 1305

Prunus spp.
—*P. cerasifera*, leaf scorch, California, S47
—*P. domestica*, *plum pox virus*, genetic transformation, S107
—*P. persica*, brown rot, appressoria, role in pathogenesis, 1072
—*P. salicina*, *Plum pox virus*, D and M types, interference, 320
Pruvost, O., 1345
Pryor, B. M., S24, S75, S116, S132
Pscheidt, J. W., S95, S170
Pseudomonas spp.: on canola, biocontrol, S12; corn and soybean, rhizosphere abundance, farming practices, S100; detection, PCR analysis, S128; strain genomic diversity, Turkey, S9
—*P. chlororaphis*, biocontrol agent, transcriptional regulator, S106
—*P. fluorescens*: antifungal metabolite, soilborne pathogen suppression, S170; on broccoli, biological control, 408; 2-4-diacetylphloroglucinol production by, rhizosphere colonization, 751
—*P. savastanoi*, on olive, factors, 313
—*P. syringae*: on *Arabidopsis*, immune defense regulator, S151; on brassica, outbreak in South Carolina, S121; genomes, PPI website, S68; genomic islands, S148; Hrp type III secretion system, role of delivery, S81; on peach, nematode and chemical factors, 608; on tobacco, Gac two-component system, S74; on tomato, defense suppression, molecular basis, S151; on tomato, transcriptional activators, S8; type III effectors, tomato susceptibility, S151
Pseudoperonospora cubensis, on watermelon, resistance sources in US plant introductions, S63
Pseudotsuga menziesii, damping-off and root rot, seedlings, 1124
Pseudozyma flocculosa
—biocontrol fungus, *cyp1* gene, S73
—ecological studies, GFP technology, S83
Publication
—academic career development, factors, S158
—mentor training, merits, S158
Puccinia spp., on cereals, modeling, Russia, S102
—*P. coronata*, microsatellite library, S27; on oat, virulence frequencies in USA, S20; phylogenetic analysis, S112
—*P. crupinae*, on *Crupina vulgaris*, variability, S17
—*P. graminis*: aerial transport, detection, early warning system, S173; on oat, Australian population diversity, 96; on wheat, race TTKS resistance, S55
—*P. jaceae*, on yellow starthistle, biocontrol in California, S36
—*P. lagenophorae*, on *Senecio vulgaris*, tolerance, 718
—*P. polysora*, on maize, resistance, plant introductions, S21
—*P. punctiformis*, on *Cirsium arvense*, systemic infections, insect-transmitted spores, 813
—*P. sorghi*, on corn, virulence spectrum, S180
—*P. striiformis*, on wheat: epidemic in USA, S23; molecular and virulence differentiation, S73
—*P. triticina*, on wheat: pathotype distribution and cultivars, 264; population genetics in Asia, S62; Russia, S130; on wheat, world-wide collection, S87

Spinach
—downy mildew, homozygous resistance, S12
—markers for traits, genomic BAC library, S115
Spiroplasma spp.
—*S. citri*, genetic diversity, assessment, S77
—*S. kunkelii*, genomic variation, S19
Spongospora subterranea
—on potato, cystosorus production, genetic analysis, 1157
—*Potato mop-top pomovirus* vector, Costa Rica, S164
Spotts, R., S18, S168, S171
Sprenkel, R., S97
Spring, O., S47
Spröer, C., S153
Spruce
—sapstain, bioprotection with *Ceratocystis resinifera*, 526
—top dieback, in Norway spruce, December cover
Squash, wild and hybrid populations, gene flow, S178
Srizhekozin, J. A., S102
Stack, J. P., 1108
Stackebrandt, E., S153
Stagonospora nodorum
—genetic variation, north central USA, S3
—mating types, recurring reproduction, 234
—on wheat: distribution in Ohio, 1355; major resistance genes, S108
—on winter wheat, North Carolina, 860
Stahl, D., S141
Stalpers, J., S133
Stander, J. R., S111

Stiles, C., S101, S159
Stinner, D. H., S11
St. Martin, S. K., S174
Stockwell, V. O., S171
Stone fruit
—brown rot, appressorium role in pathogenesis, 1372
—replant disease: soilborne bacteria, California, S167; soilborne fungi, associations, California, S166
Stone, J., S136, S145, S170
Stone, L. J., S4
Stoner, M. F., S171
Straminipiles, phylogeny, mitochondrial DNA, S134
Strausbaugh, C. A., S111
Strawberry
—chlorine effect on decay, S7
—Muscador effect on growth, S78
—*Strawberry latent ringspot virus*, genomic analysis, S116
—*Trichoderma* for biocontrol, methyl bromide alternative, S164
Streptomyces spp.: pathogen inhibition, Lower Rio Grande Valley, S39; phytotoxin thaxtomin, blue light-specific regulation, S57; on potato, genetic variation in USA, 1363; on potato, thaxtomin biosynthesis, S55; on wheat, endophytic root colonization, S80
—*S. ipomoeae*: on sweetpotato, bacteriocin analysis, S105; thaxtomin C biosynthetic gene cluster, cloning, S42
—*S. scabiei*, on potato, suberin effect, S36
—*S. scabies*, virulence loci, S135
Stringher, L., 689

Sudarshana, P., S75, S111
Suenaga, K., 784
Sugar beet
—Aphanomyces root rot, agricultural waste lime effect, S123
—Cercospora leaf spot, pyraclostrobin for, adjuvants, S60
—cyst nematode, suppression by fungi in field plots, 855
—*Rhizoctonia solani*, cyto-histopathology, S82
Sugarcane
—aflatoxin, Texas, S38
—brown rust, soil properties and yield loss, S43
—leaf scald: albicidin biosynthesis gene variation, 33; pathogenicity of strains in Guadeloupe, 1081
Sugarcane yellow leaf virus, distribution in Costa Rica, S165
Sugawara, T., S112
Sugio, A., S151

Tobacco (see also *Nicotiana* spp.)
—bacterial pustule, hypersensitivity, pectic lyase homolog, 1230
—blue mold, fungicides and acquired resistance, S180
—*Potato virus Y*, salicylic acid suppression, 255
—tombusvirus resistance, introgression of locus, 453
—virus control, planting date and imidacloprid, S27
Tobacco mosaic virus, movement protein, function analysis, S109
Todd, J. W., S41
Togninia fraxinopennsylvanica, on grape and ash, California, S168
Toler, J. E., S187
Tolin, S. A., S79
Tomaso-Peterson, M., S92, S115
Tomato (see also *Lycopersicon esculentum*)
—bacterial canker, seed transmission, S132
—bacterial spot, management with fungicides and bacteria, S98
—bacterial wilt: acibenzolar-S-methyl treatment, S44; biorational compounds, greenhouse, S54
—bacteriophages, survival factors, S53
—begomoviruses, PCR for detection, 517
—Botrytis blight, volatile emission, S54
—*Botrytis cinerea*, botanical extracts for control, Mexico, S95
—*Clavibacter*, *Pseudomonas*, and *Xanthomonas* spp., PCR assay, S181
—disease control, resistance pathways, S14
—Fusarium wilt, *Trichoderma* for suppression, S117
—late blight, genes, near-isogenic genotypes, S18
—management, grafting and multi-strategies, S98
—*Pepino mosaic virus*, population in Spain, 274
—postharvest pathogens, chlorine dioxide control, S9
—powdery mildew, physical control, precipitator and dielectric insulators, 967
—*Pseudomonas* spp., field management, S11
—spotted wilt, management with oils and films, S97
—*Streptomyces* spp. for disease control, S48
—viral diseases in Italy, integrated management, S34
Tomato chlorosis virus
—on tomato, Mexico, S5
—*Tomato spotted wilt virus* interaction, resistance breakdown, 1263
Tomato mottle virus, silencing suppressor, satellite DNA, S45
Tomato spotted wilt virus
—new host and location, S187
—on peanut, soilborne fungi relation, S59
—on tobacco, timing applications, S184
—on tomato, pepper and cabbage, reassortment, S1
Tomato yellow leaf curl virus
—on *Capsicum* spp., symptomless hosts, 447
—on tomato: in Mexico, S38; resistance evaluation, 1404
Tombusvirus, forest water drainage, New Zealand, S181

Xanthomonadales, genomic analyses, S136
Xanthomonas spp.: epiphyte or pathogen, S135; genome sequences, pathogenesis analysis, S70
—*X. albilineans*, on sugarcane: albicidin biosynthesis genes, 33; pathogenicity in Guadeloupe, 1081
—*X. axonopodis*: on anthurium, detection, S119; on citrus, infection factors, S14; on citrus, wind/rain effect, S13; on onion, molecular epidmiology, seed production fields, 1345; on pepper, effector gene mutation, suppressiveness in field, S59; on soybean, hypersensitivity, pectate lyase, Thailand, S179; on tobacco, hypersensitivity, pectic lyase homolog, 1230; on tomato and pepper, molecular characterization of strains, Turkey, S9
—*X. campestris*: on *Arabidopsis*, flagellin polymorphism, S111; on bean, strain diversity, multiple introductions, 1204; on bell pepper, bactericides, S64; on brassicas, isolate comparison, related pathovars, 735; on carrot, symptomless, S167; cyclic di-GMP signaling, S136; on pepper and tomato, genomics, S135; on *Phaseolus vulgaris*, genetic diversity, breeding lines, S148; on radish, lesions, cover photo, July; on tomato, HEAT-repeat protein, host interaction, S151; on tomato, Illinois and Mexico, S103; on tomato, visualization with laser scanning microscopy, S54; weed reservoirs, New York, S64, S180; on weeds, genetic diversity in California, S52
—*X. euvesicatoria*, *X. perforans* suppressing, bacteriocin, S48
—*X. fragariae*: detection, PCR assay, S51; on strawberry, hot-water treatment, S47
—*X. oryzae*: cellulose genes and pathogenicity, S66; host gene activation, transcription effectors, S151; $HpaG_{Xooc}$ protein, glycine-rich motif and cysteine suppression, 1052; lipopolysaccharide biosynthesis, chemotypes, S89; on rice, Asian and African strains, S41; on rice, pathogenicity and *hrp* genes, S24; on rice, population in Korea, resistance genes, 867; on rice, strain diversity in Korea, S66; secretion system, DNA microarray, S58; specific avirulence genes, S121
—*X. smithii*, on citrus, Korean strains, S66
—*X. translucens*, on asparagus, classification, 876

Xylella fastidiosa
—bacteriophage libraries, random peptides, S35
—on citrus, "*Candidatus*, Liberibacter sp.", S68
—on coffee, distribution in Costa Rica, S165
—collections and genomic research, S133
—colony morphology, variation in Costa Rica, S164
—on elm, detection in Oklahoma, S30
—epidemiology in Costa Rica, S81
—exopolysaccharide, detection, S100
—genomics, plant pathogenesis and insect transmission, S136
—on grape: almond, or oleander, California, S47; cold therapy, mechanisms, S78; Costa Rica, S162; motility trails on culture media, S22; site-directed mutagenesis, S47; sporadic nuisance, S163
—isolate comparisons, Costa Rica and the Americas, S164
—leafhopper vectors: Costa Rica, S163; ecological relations, S163
—on pear, multigenic sequence comparison, Taiwan, S23
—pathogen description, S136
—pathway protein, secretion, S119
—sharpshooter interaction, location in foregut, S7
—strains, genomic analysis, S127
—strains and gene locus, S22
—twitching motility, genes, S180
Xylem, *Clavibacter michiganensis* and *Agrobacterium vitis* colonization, microfluidics, S113
